DESIGN AND PERFORMANCE IN ONE

Performance, design, installation and maintenance are just four of the aspects that were the focus during the development of KITE Ceiling.

The air diffuser was named after the bird Kite, which is the coat of arms of the municipality of Tomelilla, Sweden. What does Sweden have to do with it?

Simple, it was here the diffuser was developed and is produced!

Easy Access

With the help of the spring function on the front of KITE Ceiling, installation, commissioning, maintenance and cleaning are uncomplicated and fast. Which saves both time and money.
