

Price list 2021 Residential Range

- Dehumidifiers
- Dehumidifiers with heat recovery
- Heat recovery units
- Air distribution accessories
- Jonix sanitization

General sales conditions

The prices indicated have to be considered as Ex Works.

For specific and/or special quotations, please contact our Sales Dept.

Lead times have to be agreed, together with special conditions, when the order is placed.

Ordered products can be collected the following day if they are in stock.

Products can only be collected in the afternoon. For special necessities, please arrange the times when ordering.

Orders of below €200.00, net price, will not be handled.

Standard warranty: 12 months from the invoicing.

For any further information feel free to contact our Depts.

RDE - Polypropylene heat recovery unit

High efficiency horizontal and vertical controlled mechanical ventilation system, thought to grant both energy performances and indoor air quality.

Our RDE models grant a good air quality within the ambiances, and also the necessary fresh air, by reducing consumption. The free-cooling function is included; it allows even more seasonal efficiency.

Models		RDE	
Technical data		020	035
Efficiency rate*		A/A+	A/A+
Air flow	m ³ /h	200	350
Available static pressure	Pa	160	100
Efficiency	%	90	90
Recovered thermal power (winter)	Watt	1520	2576
Recovered thermal power (summer)	Watt	525	533
Sound level	dB(A)	50	50
Power supply	V/ph/Hz	230/1+N/50	230/1+N/50
Connection diameters	mm	160	160
Dimensions	mm	870 x 660 x 300	870 x 660 x 300
Weight	Kg	19	19
Price List		2.344,00 €	2.625,00 €

* To get the efficiency rate A+, the heat recovery should be equipped with the advanced control and (at least) one probe (humidity or CO₂), see the options and accessories chart.

Accessories for air sanitization

Jonix technology is based on oxidation induced in the air by gas-plasma or low temperature cold plasma; it exploits the microbicidal action of a mixture of ionizing gases composed of a large quantity of charged particles, such as ions or electrons, reactive oxygen species, molecules and neutral atoms. The Jonix system does not use any chemical substance, but uses the electric current to sanitize the air that is present in the environment to be treated.

In the healthcare field, the gas-plasma methodology is the most advanced for sterilization and is used on medical-surgical devices.

The simplicity and versatility of Jonix technology makes it possible to apply this solution to many applications where the sanitization of objects and surfaces is necessary, so as to eliminate micro-organisms dangerous to health, which may have deposited on them.

This effect makes this technology useful in many areas where health and hygiene aspects are as important as in the biomedical field, in the food industry, in the home, in the field of wastewater treatment and waste treatment, in the field industrial in general or in any area where VOC abatement (volatile organic compounds) is required. The products offered by HiDew consist of plenums, differentiated according to the sanitized air flow rate, to be installed on the supply air channels.
